

Reproductive health services offered by health clinics and hospitals

Evaluation of Reproductive Health Services level by female patients

Reasons for preferring to have boys over girls by female patients

- 1

Males are the bond of the family
- 2

Not having a baby boy, encourages husband to remarry
- 3

To ensure a successor for the husband
- 4

The wife loses credibility among husband's family if she did not give birth to a boy

Reasons for not visiting reproductive health services from the point of view of women

The low level of receiving services due to the lack of medical staff, in addition to the lack of examination or treatments

1

Lack of family planning services

2

Lack of interest or knowledge of reproductive health services other than those related to pregnancy and vaccination for the mother and the child

3
