RRM delivers immediate, life-saving assistance, within 72 hours of a trigger being activated, to highly at-risk families while they are on the move, located in hard-to-reach areas, caught at checkpoints or stranded between military front lines. Each RRM kit, which is meant to be a week’s supply per family, consists of immediate response food rations, a hygiene kit, a dignity kit, potable water and a water container. RRM assists most of the displaced families multiple times at various locations, as their displacement continues with no access to life-saving essentials.

**Key Figures**

- **487,174** RRM Kits Distributed in 2017
- **2,491,880** Beneficiaries reached in 2017

**Highlights**

Since 2014, RRM consortium has reached 8.5 million IDPs with 1.4 million emergency kits.

In December, overall RRM deliveries decreased by 36%. However, distributions in Erbil (Makhmur) increased by 41 percent during the month, in a comparable timeframe.

In December, majority of the individuals (57 percent) were reached in Ninawa governorate.

In 2017, the consortium has assisted around 469,767 families including 1,366,052 children.

WEO carried out majority (45 percent) of the distributions for the consortium during December.
